# Syntaxe d'une classe générique

```
class MyClass<T>(val var1: T)
val instance = MyClass<Int>(5)
```

The diagram consists of three blue arrows. One arrow points from the 'T' in the class definition's parameter list to the 'Int' in the class instantiation. A second arrow points from the 'T' in the class definition's parameter list to the 'var1' variable. A third arrow points from the '5' in the class instantiation to the 'Int' in the class instantiation.
